Yeah it's fine. I'd leave out the line on the plume location. On Drinking water here's a correction.

NNEPA also requested drinking water sampling support immediately for Navajo operated drinking water wells (Montezuma Creek) and a water intake.

The DW intake is located in Mexican Hat UT is off line. Two feeder canals from the San Juan were closed as a precaution. EPA and NNEPA will conduct sampling to ensure water quality in these locations.

Thanks!
